Not sure who this volume is intended for, but certainly not the DIY’er. It is simply a picture book of rooms lit differently. However, you have no idea what type of lighting or how it was done or even where the lights are. Do over.

There is a lot of common sense ideas in this book. I was hoping for something more but never found it. Sorry. I’m going to try to get a dollar at my yard sale for this book.....I might even take 50 cents.

You can find various lighting elements and also different solutions...I love it...Its really a useful book...
