This is an Awesome Guide on Survival. I really love this book as this contains so many tactics that you can use in survival. In this book, Mike Haman started with the skills that you need to have for survival. Example of these skills is how to grow your own food and become self-sufficient. He also included the list of vegetables that you can nurture and grow. Another topic is about purifying water, how to find it, and how to safely purify it. He also included a survival kit sewing supplies for your clothes. My most favorite chapter in this book is the chapter about the first aid. The advice here are very valuable, not just for survival, but we can use them for everyday life. Some examples included are treating shocks, CPR, cleaning and dressing wounds and many more, together with the medical supplies for survival. Another valuable topics are about proper storage of food and water, learning how to defend yourself, and training your mind to have a survival mentality. Overall, this is an Awesome Book on Survival.
